Evaluating Solutions for Sustainable Ranching in the Southwest

Which solution did you choose (circle one)?

Rarámuri Criollo

Precision Tools

Grass-Fed Beef

Read the two-page paper on your solution and list at least one strength and one weakness related to environmental sustainability and economic sustainability.

	Criteria for Success	
	Environmental Sustainability the environment directly affected by beef production and the level of pollution resulting from it	Economic Sustainability costs and income directly related to beef production; profitability of beef production
Strengths		
Weaknesses		

How would you improve this solution?

Presenting Your Issue

Directions: Use your work on page 1 to create a presentation with the information listed in the checklist below. Your presentation will be evaluated by your peers using a scorecard with the components in the checklist below.

Your presentation needs to include the following:	
	Check mark
An attention-grabbing introduction	
Explain how the constraints of environmental and economic sustainability impact your solution by evaluating the strengths and weaknesses.	
Strengths viewpoint <ul style="list-style-type: none"> • Identification of strengths with regard to both environmental and economic sustainability • Why might it succeed? 	
Weaknesses viewpoint <ul style="list-style-type: none"> • Identification of weaknesses with regard to both environmental and economic sustainability • Why might it fail? 	
Ensure that the presentation is creative, informative, and the correct time length.
